*This week has been a very special experience. We have seen beautiful places: the cities of Padova, Venezia and Rovigo, of course. We visited museums, churches and squares. We have got in touch with each other's cultures: we tasted typical Italian food as well as the Greek one. We have learned our habits and, living together lead us to know better each other, with our merits and defects. This experience has been full of fun, shopping and a lot of emotions. We are both sure that now we have a lot of friends all over Europe.*
